

**Mintera Selected as One of
Telecommunications Magazine's
"10 Coolest Companies"**

Lowell, MA - June 1, 2005 - Mintera Corporation, a global performance leader enabling migration of optical transport to 40 Gigabits per second (Gbps) in metro, regional, long-haul and ultra long-haul optical networks is pleased to announce that it has been selected as one of Telecommunications Magazine's "10 Coolest Companies" and will be honored at a breakfast event at the SUPERCOMM 2005 conference. The selected companies will also be highlighted in the June issue of Telecommunications magazine.

The award recognizes Mintera for the focus of its technical expertise on the creation of practical business solutions for service providers. The award also coincides with Mintera's successful Series B round of financing. Details of the announcement may be found on Telecommunications Magazine's website

Terry Unter, Mintera's CEO will be accepting the award at the SUPERCOMM 2005 conference breakfast event.

About Mintera Corporation

Mintera is a global technology leader enabling migration to 40 Gbps optical transport in metro, regional, long-haul, and ultra long-haul networks. Mintera's flexible multi-service 40 Gbps product-set enables service providers to upgrade their existing infrastructure to 40 Gbps in an evolutionary and seamless fashion. Mintera continues to gain customer traction since demonstrating the world's fastest ultra long-haul optical transport connection in June 2004 in a trial with MCI and Ciena Corporation. The company is also working with multiple research and development labs at carriers, systems suppliers, component manufacturers, research institutes and universities to conduct ongoing tests to drive down costs for 40G transmission.
